

Environmental Policy Statement

Ramsay is committed to protecting the environment and preventing pollution by minimising the impact of our processes and actions upon the environment by encouraging the elimination of wasteful and harmful processes and raw materials from our Business. Where this is not possible we are committed to controlling the risk and damage that these processes are capable of.

Continuous Improvement

Ramsay has put in place a system for recording information on waste and harmful processes and materials. The system priorities the cost benefit relationship of any agreed action and allocates sufficient resource to minimise or eradicate the environmental impact.

Legislation

Ramsay is committed to comply with all applicable laws, regulations and other requirements. The Company maintains a legal register which is updated continuously.

Education and Training

Ramsay is committed to raising the awareness of our employees, stakeholders, suppliers and customers. We achieve awareness by communication and attendance at appropriate training seminars.

Monitoring

Ramsay operate a continuous improvement policy throughout the Business which ensures that environmental impacts are kept at the forefront of our Business agenda and are acted upon and reviewed at regular intervals. Environmental objectives are set and reviewed on an annual basis.

Ramsay is fully aware that it has a significant impact in the following key areas:-

- Transport
- Packaging Materials
- Waste Minimisation and the effect of land fill
- Efficient energy utilisation
- Control of Hazardous and Special Wastes

Ramsay has instigated specific continuous improvement projects in relation to these activities.

Mr.P.Killeen

Managing Director
